OBJECTIVE

Driven by curiosity, I'm an IT student with a strong interest in data analysis and web development and eager to apply my knowledge while developing new skills. Looking forward to contributing effectively in a dynamic environment and gaining hands-on experience to grow both personally and professionally. I'm looking for opportunities where I can learn by doing, collaborate with others, and contribute meaningfully to projects.

INTERNSHIP & EXPERIENCE

Business Development Specialist Intern

Younity.in | Mar 2024

- Worked as a Business Development Specialist Intern, managing sales operations and ensuring the achievement of business targets.

PROJECTS

- **Food & Beverages Dataset** (Data Science Project, 2025)

Conducted analysis on a Food & Beverages dataset using Python (Pandas, NumPy, Matplotlib, and Seaborn). Extracted meaningful insights regarding sales patterns, customer preferences, and seasonal trends. Built data visualizations to enhance business decision-making.

- **Home Chef Hub** (Web Development Project, 2025)

Developed a dynamic website for home chefs to allow customers to book chefs who can visit their place and cook for them. Utilized Java, HTML, CSS, and MySQL to create an interactive and user-friendly platform.

CERTIFICATIONS

- **Data Science Certification** – Strong knowledge and consistency in data science concepts.
- **Human Psychology Certification** – Developed a deeper understanding of human behavior.
- **Advanced Excel Certification** – Proficient in advanced functions, data analysis, and visualization techniques in Excel.
- **Placement training & networking Certification** - Gained practical knowledge in interviews, aptitude preparation, and professional networking to enhance career growth.
